RELiZORB Availability from Central Distribution

IMPORTANT POINTS TO REMEMBER:

- RELiZORB will continue to be ordered by providers through PowerChart for patients who may benefit from the delivery of absorbable fatty acids and monoglycerides from enteral nutrition (e.g., cystic fibrosis patients, etc.).

- Nurse will need to order RELiZORB #35683 and MICKEY extension set - #22702 from Central Distribution.

- RELiZORB will be connected in-line with existing enteral feeding pump tubing set and patient extension sets or enteral feeding tubes. Up to two (2) cartridges may be used per day.

- Nurses will document the device is in use within the Nutrition section in the Quick View. Please see the screenshot to the right.

RATIONALE: RELiZORB, a digestive enzyme cartridge that contains the enzyme lipase, is considered a device and, therefore, will be supplied by Central Distribution effective October 3, 2017.

Distribution: All Inpatient Nurses, Nursing Leadership, Educators

Effective: 10/03/17
